Heroku, Github, Bitbucket, JIRA, Microsoft Office Suite, Microsoft Publisher, Adobe Photoshop, Adobe Illustrator, Adobe Lightroom, Adobe Dreamweaver, Wordpress

EXPERIENCE

LAMP Camp | Junior Developer

Building and developing the best possible enterprise-level application solutions for supply chain with PHP, MySQL, Javascript and much more.

- Built an interface feature that helps users to easily correct mislabeled stock items, assign correct fill-SKUs and save those corrections to the inventory database
- Built the back-end view for our Manual Sales Order so our users could manually enter inventory information for our online retail inventory management system
- Created a color-coded client-status tracking system within the user interface of our supply chain pipeline
- Deployed projects using Git control in a collaborative Agile project management development environment; tested applications and code reviewed with the latest methods and standards

Kingsoft | Product Manager

Improving and marketing Battery Doctor and Clean Master for the product release in international markets.

- Assisted HR in foreign recruitment, translation of important notices into English, and creating a more international work environment
- Managed customer feedback and social media (G+, Facebook, Twitter)
- Increased the Google Play star rating from 4.5 to 4.52 in two weeks
- Increased Facebook 'Likes' from 7,000 to over 150,000 in 2 months
- Acted as liaison between users/developers/designers/testers to improve UX
- Increased US CTR (click-thru-rate) from 2.6% to 3.7% in 3 weeks
- Conducted user experience surveys and product usability tests
