Professional Experience:

Web developer (contract), Levin Papantonio Law Firm, July 2015 to February 2016

- Led the redesign and development process of an employee intranet system for a law firm with over 150 employees
- Streamlined the content management and event scheduling process for administrators and improved load times for users
- Improved site navigation and the user experience by overhauling the existing UI design and information flow and implementing a cohesive style guide

Web designer & developer, Duncan McCall Advertising, July 2014 to June 2015

- Developed the responsive interface for an award-winning tourism campaign
- Designed and implemented custom and responsive web design interfaces for local clients

Web developer, Footbridge Media, June 2013 to July 2014

- Built over 50 WordPress websites in accordance with current web standards
- Improved site completion time by streamlining the development process
- Provided website maintenance and troubleshooting for over 200 clients

Web developer (contract), BuggyWorx, March 2013 to June 2013

- Developed an e-commerce site for a local golf cart dealership
- Organized and populated a database with multiple suppliers and thousands of products

Site administrator and web developer, The Record Stache, January 2012 to present

- Developed and designed the responsive interface for an indie music news website, including a custom WordPress theme and interactive features
- Provide ongoing support and feature upgrades as needed
