CAREER SUMMARY

MEAN full stack developer conversant in user experience design, native JavaScript and HTML5 and functional programming techniques. I am committed to building scalable and maintainable web experiences.

EDUCATION

Western Kentucky University 2004-2008

EXPERIENCE

Freelance Full Stack Developer 2015-present

Building scalable maintainable websites and single-page apps for small businesses and individuals in native JavaScript and framework-assisted contexts.
Creating mobile apps using frameworks such as Ionic and Cordova.

PhotoShelter 2014-2015

Client Services Associate

Resolving technical support requests via phone and email.
Creating website solutions for users, troubleshooting with hand-coded HTML5, CSS, JavaScript and third-party APIs.
Advocate for user experience in regular meetings with the Product team.

Apple, Inc. 2011-2014

Product Specialist

Troubleshooting and diagnostics of Apple hardware and software.
Intake and triage of hardware for advanced technical support at the Genius Bar.
Creating tech solutions for customers on the fly to improve their workflow.

Horticultural Society of New York 2010-2011

Project Coordinator, Web Design Associate

Designed and implemented intake and tracking application for participants in the Hort's jail-to-street program.
Designed content strategy of social media channels for volunteer campaigns.

One Club for Art & Copy 2010

Project Coordinator

Coordinating logistics with production staff for the One Show 2010 award season.
Archiving and organizing art work in integrated content management systems.
Member of the production team that coordinates the awards show held annually.
