iOS developer with experience in emergency medicine, business operations, sales, project management, and team management. Self-motivated Udacity Nanodegree graduate, skilled in Swift with a passion to drive change and growth in a collaborative team environment.

SKILLS

Programming Languages: Swift, Objective C (Beginner)

Frameworks: CoreData, UIKit, Alamofire, MapKit, AVFoundation, CoreLocation

Other: Xcode, Git/GitHub, Firebase

PROJECTS

Musicly – <https://github.com/seanperez29/musicly> *September 2016*

- Developed a tabbed application utilizing CoreData and AVFoundation to play music and persist a list of user's favorite songs.
- User can search for tracks by artist, song, or album (retrieved by Spotify API).
- Optimized user experience by providing reachability checks prior to accessing network and displaying content in organized tables and collections views.

Virtual tourist – <https://github.com/seanperez29/virtualtouristapp> *August 2016*

- Created a responsive application to retrieve pictures from given locations (utilizing Flickr API).
- Developed a full-page map that allows placement of multiple pin annotations and retrieval of associated coordinates employing MapKit.
- Optimized user experience by utilizing navigation controllers and persistence of photographs with accordance to pin coordinates applying CoreData.

On The Map – <https://github.com/seanperez29/onthemap> *June 2016*

- Utilized Udacity API and Parse API to retrieve locations of fellow students with custom messages about themselves.
- Optimized user experience with Udacity assets, MKMapView, MapKit, TableViews, and user recognition with login or signup.

EXPERIENCE

Palm's Concrete - Sales Consultant/Project Manager *Castle Rock, CO | Feb '12 - Jan '15*

- Organized promotional events and developed customer relations to assist in a 100 percent increase in website traffic and customer contact.
- Managed on-site projects, employees, and subcontractors.
