Experience

Junior Back-End Web Developer

Nov 2016 - Present

Okun THC

Tasked with maintaining an existing website and database, refactoring existing content, and working alongside non-technical team members.

- Developed a Java-based REST API for the IOS application
- Redesigned entire MySQL database so other developers may have clarity.

Operations Specialist

April 2016 - Nov 2016

LPL Financial

Tasked with testing enterprise web applications and their functionality by executing Functional, Regression, and System testing procedures.

- Worked alongside Software Developers and the QA team to ensure bugs were fixed through bug tracking tool, Quality Center
- Participated in Agile-Scrum meetings to discuss what features of the applications needed to be tested based on level of priority.

Programming Projects

Ultimate Tic-Tac-Toe

Derived from the iconic game, Tic-Tac-Toe, this version expands from the singular board to nine boards to declare a winner.

- This project was built using HTML, CSS, Javascript, and JQuery.
- Source Code: <https://github.com/jcl050/UltimateTicTacToe>
- Play Here: <http://ultimatetictactoe.comlu.com>

Job Aggregator Tool

Java-based program which returns a list of available job postings by automating the entire job hunting process, removing the need for manual clicking.

- This project was built using Java, and Selenium.
- Retrieves and manipulates JSON formatted data from REST-based APIS.
- Utilizes Web Scraping techniques to grab non-indexed data.
- Source Code: <https://github.com/jcl050/jobAggregator>
- Demo : <https://youtu.be/KdXlky4nvZ4>

Education

B.A Economics

Sept 2011 - March 2016

University of California, San Diego

- **CSE 8A/8B**-Introduction to Computer Science: Java(I) and (II)
- **CSE 20**-Discrete Mathematics for Computer Science
