---

## Front-end Developer

I'm a young self-taught professional with a wide range of front-end technologies, specifically in HTML, CSS, and JavaScript.

---

## Experience

### Web Designer/Developer Intern

Peekskill Web Design, Peekskill, New York, 2015 - 2016

- I contributed to projects specializing in WordPress theme development.
- I helped launch mail chimp newsletters for future subscribers of the doula community.

### Web Development

Professional Training, 2015 - present

Treehouse

- Training in web development to learn new skills.

Web Developer Bootcamp

- Building a blog application using express and mongoDB.
- 

## Projects

### Local Weather App

- I created a local weather app that uses an API to get data for local forecasts in my area.

### Grand Hotel

- In this project, I've experimented with taking a modular approach to build a one-page website using the combination of flexbox and skeleton.

### Blog Application

- Created a complicated yelp-like application from scratch using Express and MongoDB.
- 

## Education

### Bachelor of Science

Art Institute of Pittsburgh • Pittsburgh, PA • 2011

---

## Skills

**Strong: HTML5, CSS3, JavaScript, Sass, Git, WordPress** • Knowledgeable: Express, MongoDB, React, Accessibility
