Projects

Last Stop

A web application designed for people who work and play late, so they won't miss the last train or bus for the day. Last Stop finds local Muni, Bart, Caltrain,and AC Transit stops near the user's position, and displays all final buses and trains that leave from that location.

mongoSetup

A Ruby gem that installs all dependencies required for MongoDB and prepares the project gemfile to use Mongoid.

Tabula

A web application which studies written works for part-of-speech patterns which it encodes in a database. These codes are used to generate unique prose, selecting from an exhaustive list of POS tagged English words.

Experience

Faenzi Associates — *Office Manager*

Performed scheduling and administrative tasks for a small Geriatric Care office. Converted paper records into a HIPAA compliant database, streamlined payroll systems, and automated grocery purchases for clients.

Fire Extinguisher Service Center — *Office Manager*

Increased team size by 25% in 6 months by improving schedule efficiency. Changed collection methods to reduce outstanding receivables by 30%.

ESI Security — *Security Officer*

Provided security for events of various sizes, provided on-site security for a gated community, and performed patient watches at local hospitals. Supervised, scheduled, and dispatched guards for site locations. Performed frequent security audits to determine client needs.

Education

Dev Bootcamp — *Web Development*

DBC is a 19-week intensive training program for web developers, which specializes in Ruby, JavaScript, HTML/CSS, Rails, OOJS (JQuery & Ajax), Git Workflow, Deployment, and Agile Development.The program addresses rapid learning, adaptability, and interpersonal growth to foster effective teamwork and learning.
