Projects

Neighborhood Map – [Live preview](#) – [GitHub repository](#)   June 2017
- Developed a single-page, responsive application built with Knockout.js framework and hosted on GitHub Pages.
- Used Google Maps API to build a full-page map that loads with popular places on Manhattan, NY.
- User can select places for obtaining additional information from Wikipedia Articles using Wikipedia API.

Item Catalog Web App – [GitHub repository](#)   May 2017
- Created a multi-page Flask driven web application with login system and database using VM.
- User can add, edit or delete items from the catalog.

Tennis Browser Game – [Live preview](#) – [GitHub repository](#)   January 2017
- Built a single-page, browser based tennis game and hosted on GitHub Pages.
- Game tracks scoring and speeds up continuously.

Responsive Portfolio – [Live preview](#) – [GitHub repository](#)   October 2016
- Built a single-page, responsive portfolio layout website from scratch, with no frameworks hosted on GitHub Pages.
- User can navigate throughout the page using links in navigation menu.

PROFESSIONAL EXPERIENCE
