**LinkedIn:** <https://www.linkedin.com/in/vincent-snow>

I am a passionate, serious, and driven web programmer and artist looking for a rewarding contract or daytime employment in a company with good values and work-life balance. I love to utilize both technical and artistic skills together, learn new things, and solve complex problems. I enjoy creating meaningful projects, whether games or practical technology, that improve society or enrich minds and souls.

## TECHNICAL SKILLS

- HTML, CSS, JavaScript, JQuery, SASS, PHP
- PYTHON: Django, Flask, Kivy
- Java: Spring, STS, Eclipse, Swing
- Node: MEAN (Angular4, Express)
- SQL, MongoDB
- Traditional and digital artist in multiple styles
- Graphic design and editing in basic programs + Adobe suite (PhotoShop, Indesign, Premiere Pro, After Effects)
- Musical composition and editing in Ableton and Audacity

## EDUCATION

### Self-teaching (2003-present):

*HTML, CSS, traditional and digital art, graphic design with Photoshop*

### Private lessons/mentorship (03/2014-05/2014):

*HTML, CSS*

### Self-study (Codecademy) (2016-present):

*HTML, CSS, JavaScript, JQuery, SASS, SQL*

### Coding Dojo (bootcamp)(09/2017-12/2017):

*HTML, CSS, JavaScript, JQuery, Java, MEAN stack, Python, SQL*

### Self-Study (Lynda.com) (12/2017-present):

*Java Swing, Eclipse, Python Kivy, PHP with MySQL*

## EXPERIENCE

Self-employed 08/2014-present (enola reven): sole manager / owner

*website design/development, graphics, merchandise designs, music composition & production, performance, art commissions, costume creation, interviewing and hiring, sales, video and photo editing, copy writing, advertising, taxes, budgets, and bookkeeping.*

### Accomplishments

- *Produced and recorded a full length album and nine singles, accomplishing personal goals by deadlines and developing new skills.*
- *Created & debugged a responsive website for the project, increasing access to merchandise and music.*
- *Exceeded sales goals every week (minus one for illness) during one contract, boosting company's overall profit and customer connections.*
- *Far exceeded personal sales goal for 7 months out of 2015, enabling the budget to increase for the following year and more personal goals to be accomplished.*
- *Overcame hardships and loss, learned to use a cheaper technology and used resources available to successfully produce first music video with a \$0 budget, which received heavy praise from colleagues and fans.*
- *Advertised online and in-person to increase Youtube subscribers by 400%, Instagram followers by 200%, and start new income streams in 2017.*
- *Found new resources to slash website hosting expenses by 33%, and the overall expenses by 60% from the previous year's for 2018.*

## PROJECTS

### Enola Reven website – ongoing

[www.enigmatic-music.net](http://www.enigmatic-music.net)

I created and continuously manage this responsive website for my musical project. I also perform SEO on it as well as create all of the graphics. The site is back-endless, written using HTML5, CSS, JavaScript and JQuery.

### Herbal Remedies – started 12/2017

<http://vincentsnowportfolio.atwebpages.com/remedies.html>

A responsive front-end website which reveals pages of a 'book' when the index is clicked. I did the graphics in Adobe Photoshop, and coding in HTML5, CSS, JavaScript and JQuery.

### CSS Zoo – 12/2017

<http://vincentsnowportfolio.atwebpages.com/zoo.html>

An interactive page created to demonstrate CSS and JavaScript with JQuery.

### EpizoPets – started 11/2017

<https://github.com/VSnow1988/EpizoPets>

EpizoPets is a browser-based online game created with Django, written in Python. I created all of the graphics and the code, and I plan to continue working on it's features at a later date. It makes use of MySQL Workbench, mysqlite, HTML5, and CSS.
