SKILLS & TOOLS

HTML/CSS · Sass · Bootstrap · Javascript · jQuery · Git · Adobe Creative Suite · WordPress

EXPERIENCE

Student Developer Moderator

TeamTreehouse
Aug 2018 - Oct 2018

- Answer student questions in Slack.
- Review student projects.
- Post engaging questions and helpful content and resources.
- Encourage and motivate fellow student developers.

SEO/HTML Editor

FlexJobs
Apr 2015 - Jun 2018

- Served in a part-time role editing job description HTML, categorizing listings in database, and writing SEO descriptions to ensure positive job search experiences for subscribers.
- Consistently exceeded productivity standards through process and workflow automation using macros and text-expansion tools.
- Provided input on service improvement initiatives using knowledge of database management and SEO techniques.

Database Management Specialist

Trimedx
Jan 2014 - Jun 2015

- Promoted from previous position at Trimedx to assist with database management processes and data quality initiatives.
- Validated and maintained database information to meet company needs, customer requests, and regulatory requirements.
- Onboarded, set up, and published new customer accounts in database and assisted with various database quality and performance audits.
- Accepted work-from-home role at another company when spouse was promoted to a position with significant travel required and my 2-hour commute to Indianapolis each day was no longer feasible.

Regulatory Affairs Coordinator

Trimedx

Feb 2013 - Jan 2014

- Recruited to assist with the implementation of medical device management plans and coordinate alert and recall processes.
- Built processes and structure around the company's regulatory department. Efforts streamlined alert and recall processes and enhanced database accuracy.
- Applied knowledge of HTML and Microsoft SharePoint to improve department intranet page and set up document repositories, resulting in higher levels of document control and information dissemination.

Database Administrator

Indiana University Health

Sep 2010 - Feb 2013

- Recruited to set up database system at a new hospital and serve as a point of contact for all support requests, questions, and training needs.
- Oversaw database integrity and worked to ensure proper system use to meet department, end-user, and customer needs.
- Managed database processes and worked to maximize performance and reporting capabilities.
- Position eliminated unexpectedly following hospital's decision to outsource department in an organizational realignment initiative.
