» SUMMARY «

I started my career in Network/Server Administration, but my true passion is in software development. That is why I enrolled in Bloc's software development program so that I could enhance my talents and gain the skills needed to make an impact. I am a hardworking team player who is looking to expand my technical knowledge and experience. I'm looking for a company where I can contribute and ship code; and I'm ready to relocate anywhere for it!

» SKILLS «

DEVELOPER
Javascript/ES6
React/Angular/jQuery
Node.js/Express.js
Ruby on Rails/RSpec
Python
HTML5/CSS3/Git

ADMINISTRATION
SQL (MySQL, PostgreSQL, SQLite)
MongoDB/NoSQL
Server Admin (Windows/Novell)
Network Admin (Cisco)
Linux/UNIX

» PROJECTS «

NEWTON'S APPLE
Newton's Apple is a Command Line Interface(CLI) tool to simplify component creation for developers working on ReactJS projects. Running a simple command, it will create a file with the name you specify and generate the boilerplate code for a typical React smart component. Support for Redux boilerplate code is coming soon. Developed in Node and published to NPM with currently over 300 downloads.

RETROCADE
Retrocade is a retro-style arcade gaming app. Currently only Pong and Snake are available, but additional games are very easy to add. Once your game ends, if you achieve a high score, you will be asked to input initials and score will be saved, then the current 10 highest scores will be displayed. Built with React using ES6 on the front-end, Node/Express as the back-end and MongoDB for database.

BLOCIPEDIA
Blocipedia is a wikipedia-lite app built with Ruby on Rails. Posts allow Markdown via Redcarpet, user accounts are managed with Devise, payment integrated with Stripe, and tested with RSpec.
