Shipping Supervisor turned junior web developer interested in working with full-stack development

EDUCATION

Epicodus Bootcamp   Graduation: November, 2019

- Completed the full-time, 27-week program in web development
- Studied numerous different programming languages and frameworks including Javascript, c#, .Net, Entity, and React
- Built over 50 different projects with each of the tools listed above

Highlighted Projects

- Doctor API - A website that allows a user to search for a doctor in their area by a medical condition they have or by the doctors name
- Food finder - a website that allows a user to search for numerous different categories of food within the area they're in. This application also involves a GPS map that shows the user where each restaurant is located at within the map

WORK EXPERIENCE

UPS-
Knoxville   September, 2015 - May, 2019
        -
Outbound Coordinator

- Managing 3 supervisors and 20-30 other hourly workers on a daily basis ensuring the belts are optimized to their full potential
- Coach Supervisors in their role to be productive yet effective with communicating with their employees to lead in a safe productive atmosphere
- Responsible for ensuring that the outbound warehouse operations are completed accurately and on time
- Ensuring orders comply with company standards for safety, security, and productivity
- Maintain various spreadsheets, logs, daily truck availability lists, and other paperwork to ensure proper workflow of outbound work
