LINDA IKECHUKWU

Frontend Developer

SUMMARY

I am an Electronic Engineering graduate who taught herself to code because she wanted to be a part of building products that made everyday people's life easier. I specialize in building web interfaces that are elegant yet simple, intuitive and effectively communicate products to their targeted users.

WORK EXPERIENCE

Cloud Solutions Intern (EBG)

Huawei. Lagos, Nigeria   January 2020 - Present

- Work alongside a team of 4 to troubleshoot, monitor and manage cloud infrastructure for Ikeja Electric and Department of Petroleum Resources.
- Occasionally train partner and customer engineers on how to effectively use huawei's cloud/storage products.

Frontend Developer

Luzoma Microsystems. PortHarcourt, Nigeria April - December 2018

- Worked in a team of a UI developer and backend developer to develop the web interface of over 7 web apps for clients using core frontend technologies i.e HTML5, CSS and JavaScript and sometimes WordPress.
- Optimized page performance by 30% using techniques such as minification, compression, lazy loading, caching and image optimization.
- Refactored the frontend codebase of 3 existing sites to be more modular component based and responsive, therefore improving code reusability and increased mobile traffic and usability by 20%.
